*Optional GVW package and rating. *Standard GVW. **Requires 302 V-8 engine.
#Minimum GVW with rear seat.

Bronco GVW packages are designed to aid in selecting the proper vehicle for your needs. By determining the maximum load that will be carried (including the weight of driver and passengers, cargo, and any special equipment), you determine which package to choose. For example, a Bronco that will carry over 1,300 pounds requires the 4,900 lb. GVW package. This package includes higher-rated components to provide optimum dependability and durability.
